## B.COM In Computer Studies Semester I

**Academic Year: 2024-25** 

### **Course Syllabus**

### Semester I

### 1.1 Subject 1

| 1.1 Subject 1              |  |
|----------------------------|--|
| Course Title               | Fundamentals of Information Technology   |
| Course Credits             | 4  |
| Course Outcomes            | After going through the course, learners will be able to   |
|                            | <ul> <li>Understand the basic concepts of computer hardware and software.</li> <li>Gain proficiency in using various computer applications such as word processors, spreadsheets, databases, and presentation software.</li> <li>Develop a fundamental understanding of operating systems and internet technologies.</li> <li>Introduce basic programming concepts and problemsolving techniques.</li> </ul> |
| Module 1 (Credit 1 Introdu | ) uction to Computers and Operating Systems  |
| Learning<br>Outcomes       | After learning the module, learners will be able to  |
|                            | <ul> <li>Understand the basic components and functions of a computer system.</li> <li>Differentiate between various types of hardware and software.</li> <li>Use operating system functionalities for file and software management.</li> </ul>   |
| Content Outline            | <ul> <li>Introduction to Computers</li> <li>History and evolution of computers</li> <li>Types of computers and their applications</li> <li>Basic components of a computer system</li> </ul>  |

|                      | ☐ Hardware and Software   |
|----------------------|---|
|                      | <ul> <li>Input, output, and storage devices</li> <li>System software vs. application software</li> <li>Installing and managing software</li> </ul>  |
|                      | □ Operating Systems   |
|                      | <ul> <li>Functions of an operating system</li> <li>Types of operating systems (Windows, macOS, Linux)</li> <li>File management and system utilities</li> </ul>  |
| Module 2 (Credit 1   | )<br>)  |
| Valuation of Stock   |   |
| Learning<br>Outcomes | Office Productivity Tools   |
|                      | <ul> <li>Create and format professional documents using word processing software.</li> <li>Utilize spreadsheet software for data entry, analysis, and visualization.</li> <li>Design and deliver engaging presentations using presentation software.</li> </ul> |
| Content Outline      | Word Processing   |
|                      | <ul> <li>Creating, formatting, and editing documents</li> <li>Using templates and styles</li> <li>Working with tables, images, and charts</li> </ul>  |
|                      | Spreadsheets  |
|                      | <ul> <li>Introduction to spreadsheets (e.g., Microsoft Excel, Google Sheets)</li> <li>Formulas and functions</li> <li>Data visualization with charts and graphs</li> <li>Data analysis tools (sorting, filtering, pivot tables)</li> </ul>                      |
|                      | Presentations   |
|                      | <ul> <li>Creating and designing presentations (e.g., Microsoft PowerPoint)</li> <li>Using themes and slide layouts</li> <li>Incorporating multimedia elements</li> </ul>  |

| Г                                      |  |
|--|--|
|  | Tips for effective presentations   |
|  |  |
| Madala 2 (Gaadis 4                     | \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \  |
| Module 3 (Credit 1                     |  |
| Internet Technolog                     | gies<br>   |
| Learning<br>Outcomes                   | After learning the module, learners will be able to  |
|  | Understand the structure of the internet and use various online tools effectively.  Apply best practices for internet safety and security.   |
|  | Apply best practices for internet safety and security.   |
| Content Outline                        | Internet Technologies  |
|  | <ul> <li>Understanding the internet and its architecture</li> <li>Web browsers and search engines</li> <li>Online communication tools (email, video conferencing)</li> <li>Internet safety and security</li> </ul> |
| Module 4 (Credit 1 Introduction to Pro | ogramming  |
| Learning<br>Outcomes                   | After learning the module, learners will be able to  |
|  | <ul> <li>Understand the fundamental concepts of programming.</li> <li>Write and execute basic programs using a</li> </ul>  |
|  | programming language.  |
|  | <ul> <li>Apply logical thinking to solve problems programmatically.</li> </ul>   |
| Content Outline                        | Programming Basics   |
|  | <ul> <li>Understanding algorithms and flowcharts</li> <li>Introduction to programming languages</li> </ul>   |
|  | Control Structures   |
|  | <ul> <li>Conditional statements (if, else, switch)</li> <li>Loops (for, while)</li> <li>Functions and procedures</li> </ul>  |

### **Problem Solving**

- Breaking down problems into manageable tasks
- Developing step-by-step solutions

### Assignments/Activities towards Comprehensive Continuous Evaluation (CCE)

| Sr. No | Assignments/Activities  |
|--------|---|
| 1      | Written Test/ Assignment / Project Report/ Quiz/Debate            |
| 2      | Group Discussion / Case Study                                     |
| 3      | PPT Presentations/Seminars/Workshop/ Any other innovative methods |
|        | Total - 50 Marks  |

### Internal - 50 Marks

### External - 50 Marks

  - Online tutorials (YouTube or any other source).

### Semester I

### 1.2 Subject 2

| Course Title                      | Financial Modelling   |
|-----------------------------------|---|
| Course Credits                    | 2 Credits   |
| Course Outcomes                   | After going through the course, learners will be able to  |
|                                   | <ul> <li>Understand the fundamental principles of financial modelling.</li> <li>Develop proficiency in using spreadsheet software for financial analysis.</li> <li>Create and interpret financial models for various business scenarios.</li> <li>Apply financial models to support decision-making processes.</li> </ul> |
| Module 1 (Credit 1                | )   |
| Learning<br>Outcomes              | After learning the module, learners will be able to   |
| (Specific related to the module.  | Understand the purpose and components of financial models.  |
| e.g. Define, Differentiate, Carry | <ul> <li>Develop basic proficiency in using spreadsheet software.</li> </ul>  |
| out, Design, etc.)                | <ul> <li>Create simple financial models and link financial statements.</li> </ul>   |
| Content Outline                   | Introduction to Financial Modelling   |
|                                   | <ul> <li>Definition and importance of financial modelling</li> <li>Applications of financial modelling in business</li> <li>Key components of a financial model</li> </ul>  |
|                                   | Spreadsheet Basics  |
|                                   | <ul> <li>Overview of spreadsheet software (e.g., Microsoft Excel, Google Sheets)</li> <li>Basic functions and formulas</li> <li>Data organization and formatting</li> <li>Creating and managing worksheets</li> </ul>   |

|                                      | Building Simple Financial Models   |
|--------------------------------------|--|
|                                      | <ul> <li>Setting up a financial model template</li> <li>Inputting assumptions and data</li> <li>Basic financial statements (Income Statement,<br/>Balance Sheet, Cash Flow Statement)</li> <li>Linking financial statements</li> </ul>       |
| Module 2 (Credit 1)                  |  |
| Learning<br>Outcomes                 | Advanced Financial Modeling Techniques and Applications  |
| (Specific related to the module.     | Use advanced spreadsheet functions for complex financial modeling tasks.  Develop for each translation and all all all all all all all all all al  |
| e.g. Define,<br>Differentiate, Carry | Develop forecasting and valuation models.  |
| out, Design, etc.)                   | <ul> <li>Apply financial models to analyze business cases and<br/>support decision-making.</li> </ul>  |
| Content Outline                      | Advanced Spreadsheet Functions   |
|                                      | <ul> <li>Advanced formulas and functions (e.g., VLOOKUP, HLOOKUP, IF, INDEX, MATCH)</li> <li>Data analysis tools (e.g., PivotTables, Data Tables, Scenario Manager)</li> <li>Macros and basic VBA (Visual Basic for Applications)</li> </ul> |
|                                      | Forecasting and Valuation Models   |
|                                      | <ul> <li>Revenue and expense forecasting</li> <li>Modelling working capital</li> <li>Discounted Cash Flow (DCF) analysis</li> <li>Sensitivity and scenario analysis</li> </ul>   |
|                                      | Practical Applications   |
|                                      | <ul> <li>Building a comprehensive financial model for a business case</li> <li>Analysing financial performance and projections</li> <li>Decision-making based on model outputs</li> </ul>  |

### Internal: There will be no internal for this subject

### Only external - 50 marks

### References:

### Semester I

| <b>Course Title</b>  | Business Environment  |
|----------------------|---|
|                      |   |
| Course Credits       | 4   |
| Course Outcomes      | After going through the course, learners will be able to  |
|                      | Identify internal and external factors that influence business.   |
|                      | Understand organizational culture, organizational structure and management structure.   |
|                      | Create awareness about values, norms and customs of organization  |
| Module 1 (Credit 1   | ) Fundamentals of Business Environment  |
| Learning<br>Outcomes | After learning the module, learners will be able to   |
|                      | Develop deep insight into constituents of the business environment  |
|                      | Understand the interrelationship between Business and Environment   |
| Content Outline      | Business Environment: Concept, Importance,     Interrelationship between Business and environment   |
|                      | <ul> <li>Constituents of the business environment: Internal and<br/>External environment, Educational environment and its<br/>impact, International environment ( Current trends in<br/>world, International trading environment, WTO and<br/>Trade blocks and their impact)</li> </ul> |
| Module 2 (Credit 1   | ) Project Planning and Business Promotion.  |
| Learning             | After learning the module, learners will be able to   |
| Outcomes             | Understand the Procedure for setting up a business unit   |
|                      | Know business promotion and government procedure  |

| Content Outline      | <ul> <li>Project Planning: (concept, importance and Planning process, steps i setting business objective, Feaibility study, Project report, Business size and location decision, Factors considered for new business.</li> <li>Business Promotion: Concept, Stages, Government role, statutory requirement (Licensing, Registration, procedure, document requirement and legal provision.</li> </ul> |
|----------------------|--|
| Module 3 (Credit 1   | ) Basics of Tourism  |
| Learning             | After learning the module, learners will be able to  |
| Outcomes             | Gain knowledge of the tourism industry   |
|                      | Analyze contemporary issues in tourism   |
| Content Outline      | <ul> <li>Tourism: Meaning, concept, Importance, Geographical factors influence, Types and Forms</li> <li>Trends and Contemporary issues in tourism: Tourist transport, Travel agency and tourism business</li> </ul>   |
| Module 4 (Credit 1   | ) Entrepreneurship   |
| Learning<br>Outcomes | After learning the module, learners will be able to  |
|                      | Have awareness about entrepreneurial opportunities   |
|                      | Understand and evaluate various entrepreneurial programs   |
| Content Outline      | Entrepreneurship: Concept, Importance, Growth<br>factors, Entrepreneur and Manager, Entrepreneur and<br>Intrapreneur   |
|                      | <ul> <li>Entrepreneur: Types, Competencies,<br/>Entrepreneurship Development program, Incentives<br/>to Entrepreneurs in India.</li> </ul>   |
|                      | Women Entrepreneurs: Problems and Promotion  |

### Assignments/Activities towards Comprehensive Continuous Evaluation (CCE)

| Sr. No | Assignments/Activities |
|--------|------------------------|
|        |                        |

| 1 | Written Test/ Assignment on any of the module/ Project on Preparation of Business plan, sample promotion of a product etc./ Quiz/Debate |
|---|---|
| 2 | Group Discussion on Tactics of Business promotion,<br>Current trends in Tourism etc./ Case Study on Successful<br>Indian Entrepreneurs  |
| 3 | Presentations/Seminars/Workshop/ Any other innovative methods   |
|   | Total - 50 Marks  |

### **Internal - 50 Marks**

### External - 50 Marks

### Semester I

| Course Title           | Business Mathematics  |
|------------------------|---|
| Course Credits         | 4   |
| <b>Course Outcomes</b> | After going through the course, learners will be able to  |
|                        | <ul> <li>Practice mathematical expressions, formulas, equations,<br/>and relationships in a range of situations.</li> </ul>                 |
|                        | <ul> <li>Demonstrate mathematical skills required in<br/>mathematically intensive areas in Economics and business.</li> </ul>               |
|                        | <ul> <li>Analyze the role of LPP in formulating the problems and<br/>graphical solutions to LPP</li> </ul>                                  |
|                        | Calculate nominal and effective rates of interest   |
|                        | <ul> <li>Solve the problems relating to permutations and combinations</li> </ul>  |
| Module 1 (Credit 1     | ) Matrices and Determinants   |
| Learning               | After learning the module, learners will be able to   |
| Outcomes               | Comprehend various business mathematics concepts  |
|                        | Apply the knowledge of Matrix Algebra and Inverse of<br>Matrix to solve the business problems   |
| Content Outline        | <ul> <li>Algebra of matrices. The inverse of a matrix, Matrix<br/>Operation – Business Application</li> </ul>                               |
|                        | Solution of system of linear equations (having a unique solution and involving not more than three variables) using matrix inversion Method |
|                        | Crammer's Rule.   |
| Module 2 (Credit 1     | .) Commercial Mathematics and Finance   |
| Learning               | After learning the module, learners will be able to   |
| Outcomes               | Compute Ratio, Profit, and Loss etc.  |
|                        | Estimate simple and compound interest, annuities, etc   |
|                        |   |

| Content Outline                 | Commercial Mathematics and Finance  |
|---------------------------------|---|
|                                 | <ul> <li>Ratio and percentages, commission, brokerage, trade,<br/>and cash discount, cost price, selling price, profit or loss<br/>on cost price/ selling price.</li> </ul> |
|                                 | <ul> <li>Rates of interest-nominal, effective— and their inter-<br/>relationships in different compounding situations.</li> </ul>   |
|                                 | <ul> <li>Compounding and discounting of a sum using different<br/>types of rates.</li> </ul>  |
| Module 3 (Credit 1              | ) Linear Programming  |
| Learning                        | After learning the module, learners will be able to   |
| Outcomes                        | Interpret linear programming problem and its formulation  |
|                                 | <ul> <li>Solve the LPP of maximization and minimization types graphically</li> </ul>  |
| Content Outline                 | Linear Programming Problem  |
|                                 | <ul> <li>Formulation of Linear programming Problem (LPP)</li> </ul>   |
|                                 | <ul> <li>Graphical solution to LPP (For both maximization and minimization types</li> </ul>   |
|                                 | Unbounded solution and infeasibility in LPP   |
|                                 | Cases of unique and multiple solution   |
| Module 4 (Credit 1 combinations | ) Mathematics of finance and permutations and   |
| Learning                        | After learning the module, learners will be able to   |
| Outcomes                        | Calculate nominal and effective rates of interest   |
|                                 | Explain problems relating to permutation and combination  |
|                                 |   |
| Content Outline                 | Rate of interest: nominal, effective, and their interrelationship in different compounding situations   |
|                                 | <ul> <li>Compounding and discounting of a sum using different types of rates</li> </ul>   |
|                                 | Permutations and combinations: meaning and formulae of permutation and combination of simple  |

| problems |
|----------|
|          |
|          |
|          |

### Assignments/Activities towards Comprehensive Continuous Evaluation (CCE):

### Internal - 50 Marks

| Sr. No | Assignments/Activities  |
|--------|---|
| 1      | Written Test/ Assignment / Project Report/ Quiz/Debate            |
| 2      | Group Discussion / Case Study                                     |
| 3      | PPT Presentations/Seminars/Workshop/ Any other innovative methods |
|        | Total - 50 Marks  |

#### External - 50 Marks

### **Semester I**

| Course Title           | Basics of Trade and Commerce  |
|------------------------|---|
| Course Credits         | 4 credits   |
| <b>Course Outcomes</b> | After going through the course, learners will be able to  |
|                        | Understand the concept of Trade and Types Of Trade  |
|                        | <ul> <li>Have knowledge about different forms of Business organization</li> </ul>   |
|                        | Familiarize themselves with basics of Imports & Exports   |
|                        | Gain understanding on Aids to Trade which facilitates smooth exchange of goods and services.  |
| Module 1 (Credit 1     | ) Trade, Commerce and Industry  |
| Learning               | After learning the module, learners will be able to   |
| Outcomes               | Differentiate between Small scale & Large-scale Industries  |
|                        | Learn about Types of Business Organization  |
| Content Outline        | Trade, Commerce and Industry  |
|                        | <ul> <li>Meaning, Nature, Importance</li> <li>Nature of Industries: a) Small scale b) Medium Scale c) Large Scale Industries</li> <li>Forms of Business Organisation: a) Sole Trading Concern b) Partnership firm c) Joint Stock Companies d) Co-operative Stores         <ul> <li>(Meaning, Advantages &amp; Disadvantages)</li> </ul> </li> </ul> |
| Module 2 (Credit 1     | ) Internal and External Trade   |
| Learning               | After learning the module, learners will be able to   |
| Outcomes               | Understand about Wholesale trade & Retail trade   |
|                        | Have Awareness about types of Retailers   |

| Content Outline    | Internal Trade: I   |  |  |
|--------------------|---|--|--|
| Content Outline    | <ul> <li>Itinerant - Retailers - Meaning &amp; Importance</li> <li>Wholesale Trade - Meaning, Functions &amp; Importance</li> <li>Retail Trade - Meaning, Functions, Importance &amp; Types</li> </ul>  |  |  |
|                    | Internal Trade – II   |  |  |

|                        | <ul><li>OSI Model: Layers and functions</li><li>TCP/IP Model: Layers and comparison with OSI</li></ul>   |
|                        | Data Transmission  |
|                        | <ul> <li>Analog and digital signals</li> <li>Transmission modes: simplex, half-duplex, full-duplex</li> <li>Transmission media: guided (twisted-pair, coaxial, fiber-optic) and unguided (wireless)</li> </ul> |
|                        | Error Detection and Correction   |
|                        | <ul><li>Types of errors</li><li>Parity check, checksums, CRC</li></ul>   |
| Module 2 (Credit 1     | ) Network Protocols and Architectures  |
| Learning               | After learning the module, learners will be able to  |
| Outcomes(Specific      | Differentiate between switching techniques.  |
| related to the module) | Understand MAC protocols and Ethernet standards.   |
|                        |  |
|                        | Perform IP addressing and subnetting.  |
|                        | <ul> <li>Perform IP addressing and subnetting.</li> <li>Explain the functioning of TCP and UDP.</li> </ul>   |
| Content Outline        |  |
| Content Outline        | <ul> <li>Explain the functioning of TCP and UDP.</li> <li>Switching Techniques</li> <li>Circuit switching, packet switching, and message</li> </ul>  |

|                      | Routing algorithms (RIP, OSPF, BGP)                               |
|----------------------|---|
|                      | Transport Layer   |
|                      | TCP and UDP protocols   |
|                      | Flow control and congestion control                               |
|                      |   |
|                      |   |
| Module 3 (Credit 1   | ) Network Design and Management                                   |
| Learning             | After learning the module, learners will be able to               |
| Outcomes             | Compare different network topologies.                             |
| (Specific related to | 2 Design a simple local area network                              |
| the module)          | Design a simple local area network.                               |
|                      | Utilize network management tools and protocols.                   |
|                      |   |
|                      | <ul> <li>Understand the basics of wireless networking.</li> </ul> |
| Content Outline      | Notwork Tanalasias  |
| Content Outline      | Network Topologies  |
|                      | Bus, star, ring, mesh, hybrid                                     |
|                      | Network Design  |
|                      | Designing a local area network (LAN)                              |
|                      | Introduction to VLANs   |
|                      | Network Management  |
|                      | SNMP protocol   |
|                      | Network monitoring and troubleshooting tools                      |
|                      | Wireless Networking   |
|                      | Wireless LANs (Wi-Fi)   |
|                      | <ul> <li>Mobile networks and standards (GSM, LTE, 5G)</li> </ul>  |
|                      |   |
|                      |   |
| Module 4 (Credit 1   | ) Advanced Topics in Networking                                   |
| Learning             | After learning the module, learners will be able to               |
| Outcomes             | Understand fundamental concepts of network                        |
|                      | security.   |
|                      |   |

|                 | Explain cloud computing and data center networking.  |
|-----------------|--|
|                 | Describe IoT architecture and communication  |
|                 | protocols.   |
|                 | Discuss emerging trends in networking technology.  |
| Content Outline | Network Security   |
|                 | <ul> <li>Encryption and decryption techniques</li> <li>Firewalls and VPNs</li> <li>Intrusion detection and prevention systems (IDS/IPS)</li> </ul> |
|                 | Cloud Computing and Data Centers   |
|                 | <ul><li>Concepts of cloud computing</li><li>Virtualization and data center networking</li></ul>  |
|                 | Internet of Things (IoT)   |
|                 | <ul><li>IoT architecture</li><li>Communication protocols in IoT</li></ul>  |
|                 | Future Trends in Networking  |
|                 | <ul> <li>Software-defined networking (SDN)</li> <li>Network function virtualization (NFV)</li> </ul>   |

## Internal - 50 Marks

## Semester II

## 2.2 Subject 2

| Course Title         | Sem II - E-commerce and Social Networking   |
|----------------------|---|
| Course Credits       | 2   |
| Course Outcomes      | After going through the course, learners will be able to  |
|                      | <ul> <li>Understand the fundamentals and strategies of ecommerce.</li> <li>To explore the role and impact of social networking in ecommerce.</li> <li>Analyse the latest trends and technologies in both fields.</li> </ul> |
| Module 1 (Credit 1   | ) Ecommerce   |
| Learning<br>Outcomes | After learning the module, learners will be able to   |
|                      | <ul> <li>To understand the fundamentals and strategies of ecommerce.</li> <li>To enlighten the students about the working of ecommerce websites.</li> </ul>   |
| Content Outline      | Introduction to Ecommerce   |
|                      | <ul> <li>Definition and history</li> <li>Types of ecommerce (B2B, B2C, C2C, C2B)</li> <li>E-commerce business models</li> </ul>   |
|                      | Ecommerce Infrastructure  |
|                      | <ul> <li>E-commerce platforms and technologies</li> <li>Payment gateways and digital wallets</li> <li>Security and trust in ecommerce</li> </ul>  |
|                      | Digital Marketing and Ecommerce   |
|                      | <ul> <li>Search Engine Optimization (SEO)</li> <li>Pay-per-click (PPC) advertising</li> <li>Email marketing and content marketing</li> </ul>  |
|                      | Ecommerce Strategy and Implementation   |

|                      | <ul> <li>Market research and customer analysis</li> <li>Business plans for ecommerce</li> <li>Legal and ethical issues in ecommerce</li> </ul>           |
|----------------------|--|
|                      | Case Studies and Latest Trends   |
|                      | <ul> <li>Analysis of successful ecommerce businesses</li> <li>Emerging trends: Mobile commerce, voice commerce,<br/>AI in ecommerce</li> </ul>           |
| Module 2 (Credit 1   | ) Social Networking  |
| Learning<br>Outcomes | After learning the module, learners will be able to  |
| outcomes             | <ul> <li>Explore the role and impact of social networking in ecommerce.</li> <li>Analyse the latest trends and technologies in both fields.</li> </ul>   |
| Content Outline      | Introduction to Social Networking  |
|                      | <ul> <li>Definition and history</li> <li>Major social networking platforms</li> <li>Social networking statistics and demographics</li> </ul>             |
|                      | Social Media Marketing   |
|                      | <ul> <li>Strategies for marketing on social media</li> <li>Content creation and management</li> <li>Influencer marketing</li> </ul>                      |
|                      | Social Networks and Ecommerce Integration  |
|                      | <ul> <li>Social commerce</li> <li>Shoppable posts and social media ads</li> <li>Customer relationship management through social media</li> </ul>         |
|                      | Data Analytics in Social Networking  |
|                      | <ul> <li>Social media metrics and KPIs</li> <li>Tools for social media analytics</li> <li>Case studies on data-driven social media strategies</li> </ul> |

### **Legal and Ethical Issues in Social Networking**

- Privacy concerns
- Intellectual property issues
- Ethical considerations in social media marketing

#### **Recent Developments and Future Trends**

- Augmented Reality (AR) and Virtual Reality (VR) in social networking
- The rise of ephemeral content
- AI and chatbots in social networking

**Internal: There will be no internal for this subject** 

External - 50 Marks

#### **Semester II**

## 2.3 VSC

| Course Title      | Micro Economics I   |  |  |
|-------------------|---|--|--|
| Course<br>Credits | 2   |  |  |
| Course            | After going through the course, learners will be able to  |  |  |
| Outcomes          | <ul> <li>Interpret the theories of Production functions and discuss the<br/>concept of Economies of Scale.</li> </ul>         |  |  |
|                   | Distinguish the different concepts of Cost and Revenue  |  |  |
|                   | <ul> <li>Understand the applied value of Break -Even Analysis and cost-<br/>revenue calculation through case study</li> </ul> |  |  |
| Module 1 (Cre     | dit 1) Theory of Production Function  |  |  |
| Learning          | After learning the module, learners will be able to   |  |  |
| Outcomes          | <ul> <li>Explain the concept of production function and the theories of<br/>Production Function</li> </ul>                    |  |  |
|                   | <ul> <li>Describe the different types of Economies and Diseconomies of<br/>scale</li> </ul>                                   |  |  |
| Content Outline   | <ul> <li>Meaning of production function, meaning of short and long-<br/>run production function</li> </ul>                    |  |  |
|                   | Law of Variable Proportions   |  |  |
|                   | Laws of Returns to Scale  |  |  |
|                   | Economies and Diseconomies of scale.  |  |  |
| Module 2 (Cre     | Module 2 (Credit 1) Cost And Revenue Analysis   |  |  |
| Learning          | After learning the module, learners will be able to   |  |  |
| Outcomes          | Identify the different concepts of Cost and Revenue   |  |  |
|                   | 2. Calculate the Break Even point   |  |  |
|                   | <ol> <li>Recognize the real-world utility of Break-even analysis through<br/>case study</li> </ol>                            |  |  |

## Content Outline

- Concept of Total, Average and Marginal Cost; Social and Private Costs, Economic and Accounting Costs, Fixed and Variable Costs, Opportunity Cost, Implicit and Explicit Cost (only concepts);
- Calculation of Costs with hypothetical numerical illustrations;
- Concept of revenue, Total Revenue, Average revenue; TR, AR and MR under Perfect competition and Imperfect competition;
- Break-even analysis (with the help of graph and formulae),
   Case study based on calculation of Break Even Point & calculation of TC, AC, MC.

## Semester II

## a. OEC (Open Elective Courses/ Generic)

| Course Title           | Environmental Studies   |
|------------------------|---|
| Course Credits         | 4   |
| <b>Course Outcomes</b> | After going through the course, learners will be able to  |
|                        | Understand the scope of environmental studies.  |
|                        | Analyze the factors affecting population explosion and human health.  |
|                        | <ul> <li>Create awareness about the over exploitation of forest,<br/>water, food and energy resources.</li> </ul>   |
|                        | Evaluate the causes for different types of pollutions and remedies to control pollution.  |
| Module 1 (Credit 1     |   |
| Learning               | After learning the module, learners will be able to   |
| Outcomes               | Understand environment studies  |
|                        | Know the effect of population explosion   |
| Content Outline        | Environment studies: Meaning, Definition, Scope and Importance.   |
|                        | <ul> <li>Population explosion: Population growth, Factors<br/>affecting density of population, population explosion,<br/>family welfare programme, Environment and human<br/>health.</li> </ul> |
| Module 2 (Credit 1     |   |
| Learning               | After learning the module, learners will be able to   |
| Outcomes               | Understand various natural resources on earth   |
|                        | Develop awareness in conservation of natural resources  |

| Content Outline      | Natural Resource: Types- Renewable and Non-   |
|----------------------|---|
|                      | Renewable.  |
|                      | <ul> <li>Forest resource: Use and over-exploitation,<br/>Deforestation – Causes and effects, Timber extraction,<br/>Mining, Dams and their effects on forest and Tribal<br/>people.</li> </ul>  |
|                      | <ul> <li>Water resource: use and exploitation of surface and<br/>groundwater, Floods and Droughts, Dams- benefits<br/>and problems, water conservation, Water<br/>management.</li> </ul>  |
|                      | <ul> <li>Food resource: World food problem, overgrazing,<br/>Effects of modern agriculture, Fertilizer- pesticide<br/>problem, water -logging, Salinity.</li> </ul>   |
|                      | <ul> <li>Energy resources: Growing need for energy,<br/>Renewable and Non-Renewable energy sources,<br/>hydroelectricity, Role of individual in conservation of<br/>natural resources, Equitable use of resources for a<br/>sustainable lifestyle.</li> </ul>   |
|                      |   |
| Module 3 (Credit 1   | )   |
| Learning             | After learning the module, learners will be able to   |
|                      | -<br>-  |
| Learning             | After learning the module, learners will be able to   |
| Learning             | After learning the module, learners will be able to  Understand the concept of ecosystem  Develop awareness towards forest ecosystems,  |
| Learning<br>Outcomes | After learning the module, learners will be able to         Understand the concept of ecosystem         Develop awareness towards forest ecosystems, grassland ecosystems and aquatic ecosystems         Ecosystem: Meaning, concept, structure, function, producers, consumers, decomposers, food chain, food  |
| Learning<br>Outcomes | After learning the module, learners will be able to         Understand the concept of ecosystem         Develop awareness towards forest ecosystems, grassland ecosystems and aquatic ecosystems         Ecosystem: Meaning, concept, structure, function, producers, consumers, decomposers, food chain, food webs and ecological pyramids.         Introduction, types, characteristic features, structure  |
| Learning<br>Outcomes | <ul> <li>After learning the module, learners will be able to</li> <li>Understand the concept of ecosystem</li> <li>Develop awareness towards forest ecosystems, grassland ecosystems and aquatic ecosystems</li> <li>Ecosystem: Meaning, concept, structure, function, producers, consumers, decomposers, food chain, food webs and ecological pyramids.</li> <li>Introduction, types, characteristic features, structure and function of the Forest ecosystem.</li> <li>Introduction, types, characteristic features, structure</li> </ul> |

| Learning<br>Outcomes | After learning the module, learners will be able to   |
|----------------------|---|
|                      | Understand different types of pollution   |
|                      | Develop awareness prevention of various pollution   |
| Content Outline      | <ul> <li>Air pollution: Meaning, Definition, types, causes,<br/>effects and control measures.</li> </ul>    |
|                      | <ul> <li>Water pollution: Meaning, Definition, types, causes,<br/>effects and control measures.</li> </ul>  |
|                      | <ul> <li>Soil pollution: Meaning, Definition, types, causes,<br/>effects and control measures.</li> </ul>   |
|                      | <ul> <li>Noise pollution: Meaning, Definition, types, causes,<br/>effects and control measures.</li> </ul>  |
|                      | <ul> <li>Marine pollution: Meaning, Definition, types, causes,<br/>effects and control measures.</li> </ul> |
|                      | Disaster Management: Floods, earthquake cyclone and landslides.   |
|                      | Role of individual in prevention of pollution.  |

| Sr. No | Assignments/Activities  |
|--------|---|
| 1      | Written Test/ Assignment / Project Report/ Quiz/Debate            |
| 2      | Group Discussion / Case Study                                     |
| 3      | PPT Presentations/Seminars/Workshop/ Any other innovative methods |
|        | Total – 50 Marks  |

## 2.4 OEC (Open Elective Courses/ Generic)

| Course Title                                   | Business Statistics  |
|--|--|
| Course Credits                                 | 4  |
| Course Outcomes                                | After going through the course, learners will be able to   |
|  | Describe the key terminology, concepts, tools, and techniques used in business statistical analysis  |
|  | <ul> <li>Interpret and evaluate numerical and quantitative issues in business.</li> </ul>  |
|  | Analyze the relationship between two variables   |
|  | Analyze the tabulation and classification of data  |
|  | Represent different types of data through graphs   |
| Module 1 (Credit 1 Tendency and Disp           | •  |
| Learning                                       | After learning the module, learners will be able to  |
| Outcomes (Specific related                     | Comprehend the basic concepts of Business Statistics and its Significance  |
| to the module)                                 | Solve problems associated with different measures of central tendency and dispersion   |
| Content Outline                                | <ul> <li>Definition of Business Statistics, Importance of business<br/>statistics, Needs of Data Collection and Analysis</li> </ul>                      |
|  | <ul> <li>Mean, Median, Mode and its merits and demerits with<br/>practical example</li> </ul>  |
|  | <ul> <li>Measures of dispersion- Range, Mean Deviation,<br/>Standard Deviation, 1.4 Variance, Quartile Deviation<br/>with merits and demerits</li> </ul> |
| Module 2 (Credit 1) Correlation and Regression |  |
| Learning                                       | After learning the module, learners will be able to  |
| Outcome  | Imbibe skills needed for quantitative application in business situations.  |
|  | Estimate correlation and regression in two variable analysis   |

| Content Outline    | Correlation merits and demerits,   |
|--------------------|--|
|                    | <ul> <li>Types of Correlation –(simple correlation, coefficients of<br/>Correlation- Karl Pearson and Simple rank Correlation)</li> </ul>        |
|                    | <ul> <li>Regression Analysis –Estimation of regression line,<br/>interpretation of regression coefficients with practical<br/>example</li> </ul> |
| Module 3 (Credit 1 | l) Introduction to different types of data   |
| Learning           | After learning the module, learners will be able to  |
| Outcomes           | Describe the relevance of data   |
|                    | Evaluate the merits of different methods of data collection  |
| Content Outline    | Relevance of data in the current scenario  |
|                    | Types of data: primary and secondary data  |
|                    | Methods of data collection: Questionnaire method,     Interview method, case study method in brief   |
|                    | Sources of secondary data collection with merits and limitations   |
| Module 4 (Credit 1 | l) Presentation and tabulation of data   |
| Learning           | After learning the module, learners will be able to  |
| Outcome            | Recognize the data classification and tabulation.  |
|                    | Represent the data using different types of graphs   |
| Content Outline    | Classification of data   |
|                    | Frequency distribution: Discrete and continuous series   |
|                    | Tabulation of data   |
|                    | <ul> <li>Graphical representation of data: Bar diagram, pie<br/>diagram, histogram, frequency polygon</li> </ul>                                 |

| Sr. No | Assignments/Activities                                 |
|--------|--|
| 1      | Written Test/ Assignment / Project Report/ Quiz/Debate |

### **Semester II**

# 1.4 OEC (Open Elective Courses/ Generic)

| Course Title           | Fundamentals of Accountancy Paper II  |  |  |
|------------------------|---|--|--|
| Course Credits         | 4   |  |  |
| Course Outcomes        | After going through the course, learners will be able   |  |  |
|                        | To create awareness about basic accounting concepts, principles, and conventions.                               |  |  |
|                        | To understand the classification of expenditure into<br>Capital, Revenue and Deferred Revenue Expenditure.      |  |  |
|                        | To understand the purpose of a Trial Balance.   |  |  |
|                        | <ul> <li>To understand the purpose of preparing the Final<br/>Accounts of Sole Proprietary Concerns.</li> </ul> |  |  |
| Module 1 (Credit 1     | Module 1 (Credit 1) Concepts & Conventions  |  |  |
| Learning<br>Outcomes   | After learning the module, learners will be able to   |  |  |
| Outcomes               | Understand the meaning of Basic accounting concepts, principles and conventions.                                |  |  |
|                        | <ul> <li>Understand implications while recording transactions<br/>and events.</li> </ul>                        |  |  |
| <b>Content Outline</b> | Theory:   |  |  |
|                        | Identify three fundamental accounting assumptions: Going Concern, Consistency and Accrual.                      |  |  |
| Module 2 (Credit 1     | ) Concepts of Capital and Revenue   |  |  |
|                        | After learning the module, learners will be able to   |  |  |

|                      | <ul> <li>Understand classification of expenditure into Capital,<br/>Revenue and Deferred Revenue Expenditure</li> </ul> |
|----------------------|---|
| Learning<br>Outcomes | <ul> <li>Understand Concept for classification of expenditure<br/>and receipts.</li> </ul>                              |
|                      | <ul> <li>Understand the distinction between Capital and<br/>Revenue Receipts/Expenditure.</li> </ul>                    |
|                      | <ul> <li>Understand the linkage of such distinction with the preparation of Final accounts.</li> </ul>                  |
| Content Outline      | <b>Theory:</b> Meaning of Receipts & Expenditures and Capital & Revenue, Types of Receipts and Expenditures.            |
|                      | <b>Problems on:</b> Classification of Items of Receipts, and Expenditure.   |
| Module 3 (Credit 1   | ) Trial Balance   |
| Learning<br>Outcomes | After learning the module, learners will be able to   |
|                      | Understand what is a trial balance and what purpose it can serve.   |
|                      | <ul> <li>learn the technique of taking balances from ledger<br/>accounts to prepare trial balance.</li> </ul>           |
|                      | Technique of preparation of Trial Balance.  |
| Content Outline      | Theory: Concept and Format of a Trial Balance.  |
|                      | Problems on: Preparation of Trial Balance.  |
| Module 4 (Credit 1   | ) Final Accounts of Sole Proprietary Concerns   |
| Learning<br>Outcomes | After learning the module, learners will be able to   |
|                      | Understand the purpose of preparing the Final Accounts of Sole Proprietary Concerns.                                    |
|                      | <ul> <li>Learn the items to be included in Final Accounts of<br/>Sole Proprietary Concerns.</li> </ul>                  |
|                      | Draw Final Accounts of Sole Proprietary Concerns.   |
| Content Outline      | <b>Theory:</b> Introduction, purpose of preparing the Final Accounts of Sole Proprietary Concerns.                      |
|                      |   |

| <b>Problems on:</b> Preparing the Final Accounts of Sole Proprietary Concerns. |

## **Semester II**

# 2.6 SEC (Skill Enhancement Courses)

| Course Title       | Advanced Excel  |
|--------------------|---|
| Course Credite     | 2   |
| Course Credits     | 2   |
| Course Outcomes    | After going through the course, learners will be able to  |
|                    | <ul> <li>Use Microsoft Excel to create personal and/or business spreadsheets following current professional and/or industry standards.</li> <li>Use critical thinking skills to design and create spreadsheets.</li> <li>Communicate in a business setting using spreadsheet vocabulary</li> <li>To create dynamic reports by mastering one of the most popular tools in excels - PivotTables, Pivot chart, If, Vlookup, Index, and Match etc.</li> <li>Have skills of interpreting the result of data analysis and understanding limitation and relevance of applied methods.</li> </ul>   |
| Module 1 (Credit 1 | .) Advanced Excel   |
| •                  |   |
| Learning           | After learning the module, learners will be able to   |
| Outcomes           | <ul> <li>Use advanced functions and productivity tools to assist in developing worksheets</li> <li>Manipulate data lists using Outline and Autofilter</li> <li>Use Consolidation to summarise and report results from multiple worksheets</li> <li>Record repetitive tasks by creating Macros</li> <li>Use Hyperlinks to move around worksheets</li> <li>Use goal seeking to determine the values required to reach a desired result</li> <li>Use the macro recorder to create a variety of macros</li> <li>learn how to use different functions in Excel to perform data analytics tasks, including sorting and filtering, lookup functions, and conditional formatting</li> </ul> |

| <b>Content Outline</b> | Advanced Excel   |
|------------------------|--|
|                        | Conditional Formatting   |
|                        | Data Sorting   |
|                        | Advance Filter   |
|                        | Data Consolidation   |
|                        | Data Validation  |
|                        | Data Table   |
|                        | Gol Seek   |
|                        | Scenario Manager   |
|                        | Text to Column   |
|                        | Sub Total  |
|                        | Paste Special  |
|                        | Protection   |
|                        | Macros   |
|                        | Formula Auditing   |
|                        | Define Name  |
|                        | Insert Slicer  |
|                        | Insert Time Line   |
|                        | Formula Building   |
|                        | MIS Report   |
| Module 2 (Credit 1     | ) Fundamentals of Data Analysis and Powerful Data  |
|                        |  |
| Analysis               |  |
| Analysis<br>Learning   | After learning the module, learners will be able to  |
|                        |  |
| Learning               | After learning the module, learners will be able to     Apply Excel tools and formulas to transform and structure data.  |
| Learning               | Apply Excel tools and formulas to transform and structure data.  |
| Learning               | <ul> <li>Apply Excel tools and formulas to transform and structure data.</li> <li>Create pivot tables to slice and dice your data.</li> </ul>  |
| Learning<br>Outcomes   | <ul> <li>Apply Excel tools and formulas to transform and structure data.</li> <li>Create pivot tables to slice and dice your data.</li> <li>Visualize data with pivot charts and Excel Charts.</li> </ul>  |

## **Powerful Data Analysis-II**

- Power View
- Visualizations
- Pie Charts
- Additional Features
- Power View in Services
- Format Reports
- Handling Integers
- Templates
- Inquire
- Workbook Analysis
- Manage Passwords
- File Formats
- Discontinued Features

#### Internal - 50 marks

### **External: There will be no external for this subject**

### **Comprehensive Continuous Evaluation (CCE):**

- The internal Assignment and Lab Manuals testing should be continual and spread over the semester of 25 Marks
- Practical Exam of 25 Marks (Answer any 2 question out of 4, each question will be of 10 marks + Viva of 5 Marks)

#### References:

#### A. Essential Reading

- 1. "Microsoft Excel 365 Bible: The Comprehensive Tutorial Resource": M Alexander, Wiley
- 2. "Excel Macros For Dummies": Michael Alexander, John Wiley & Sons (14 July 2015)

### **B.** Additional Reading
