	<ul> <li>Regression Analysis –Estimation of regression line, interpretation of regression coefficients with practical example</li> </ul>
Module 3 (Credit :	1) Introduction to different types of data
Learning	After learning the module, learners will be able to
Outcomes	Describe the relevance of data
	Evaluate the merits of different methods of data collection
Content Outline	Relevance of data in the current scenario
	Types of data : primary and secondary data
	<ul> <li>Methods of data collection: Questionnaire method, Interview method, case study method in brief</li> </ul>
	<ul> <li>Sources of secondary data collection with merits and limitations</li> </ul>
Module 4 (Credit	Presentation and tabulation of data
Learning	After learning the module, learners will be able to
Outcome	Recognize the data classification and tabulation.
	Represent the data using different types of graphs
Content Outline	Classification of data
	Frequency distribution: Discrete and continuous series
	Tabulation of data
	<ul> <li>Graphical representation of data: Bar diagram, pie diagram, histogram, frequency polygon</li> </ul>
